

# FIA Plots in Michigan with Ash Trees Present

## Key

Michigan counties

FIA plot with ash

FIA Plot

All FIA plots in Michigan are shown on map with those plots that contain ash trees highlighted. Sampling in the northern portions of the state is at a higher intensity and this may give a false impression that more ash trees are found in the north.

FIA plot locations as shown are accurate to within 100 seconds of their true location (100 seconds = ~ 1.2 miles)
